### DETAILED ACTION

Receipt of the amendments and remarks submitted November 17, 2000 is acknowledged.

#### *Claim Rejections 35 U.S.C. - 103*

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 35-40, 45-51 and 53-59 are rejected under 35 U.S.C. 103(a) as being unpatentable over both Anfossi et al. (Gen. Pharmac. Vol. 25, No. 6, p 1093-1100) and Maurice et al. (IDS AY) in view of Synder et al. (US patent 5,439,938, IDS AB), Gozes et al. (US Patent, 5,217,953) and Stamler et al. (US Patent, 5,380,758) for reasons essentially the same as those set forth in the prior office action. Regarding the newly added limitation "while decreasing or eliminating pain associated with the erection" and the particular sites wherein augment take place is not seen to patentably distinguish the claims from the cited prior arts. The argument that such claims are not directed to the old and well known ultimate utility (erection dysfunction) for the compounds, e.g., glyceryl trinitrate, are not probative. It is well-settled patent law that mode of action elucidation does not impart patentable moment to otherwise old and obvious subject matter. Applicant's attention is directed to In re Swinehart, (169 USPQ 226 at 229) where the Court of Customs and Patent Appeals stated "is elementary that the mere recitation of a newly discovered functional property, inherently possessed by thing in the prior art, does not cause a claim drawn to those things to distinguish over the prior art." Additionally, where the patent Office has reason to believe that a functionally limitation asserted to be critical for establishing novelty in the

Art Unit: 1617

claimed subject matter may, in fact, be an inherent characteristic of the prior art, it possesses the authority to requires the applicant to prove that the subject matter shown to be in the prior art does not posses the characteristic relied on. In the instant invention, the claims are directed to the ultimate utility set forth in the prior art. All the secondary references teach the ultimate utility of the compounds employed herein. The ultimate utility for the claimed compounds is old and well known rendering the claimed subject matter obvious to the skilled artisan. It would follow therefore that the instant claims are properly rejected under 35 USC 103.

3. Applicants' amendments and remarks have been fully considered, but are not persuasive for reasons discussed above. Furthermore, In response to applicant's arguments against the references individually, one cannot show nonobviousness by attacking references individually where the rejections are based on combinations of references. See *In re Keller*, 642 F.2d 413, 208 USPQ 871 (CCPA 1981); *In re Merck & Co.*, 800 F.2d 1091, 231 USPQ 375 (Fed. Cir. 1986). In response to applicant's argument that there is no suggestion to combine the references, the examiner recognizes that obviousness can only be established by combining or modifying the teachings of the prior art to produce the claimed invention where there is some teaching, suggestion, or motivation to do so found either in the references themselves or in the knowledge generally available to one of ordinary skill in the art. See *In re Fine*, 837 F.2d 1071, 5 USPQ2d 1596 (Fed. Cir. 1988) and *In re Jones*, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992). In this case, the primary references teach the synergistic effect of nitrovasodilator and an agent which directly activates adenylyl cyclase. The second references teach that the compounds herein are known to be useful for erection dysfunction. Therefore using the compounds herein either alone or in combination for treatment of erection dysfunction is obvious.

Art Unit: 1617

Nothing unobvious is seen in the claimed invention.

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
